- ❖ The limitation of using fiat in coin trading. It is time-consuming and costly to convert cryptocurrencies into fiat since it has to be done via intermediate partners.
- ❖ Very few trading pairs and less options for traders.
- ❖ Low system availability
- ❖ Very few payment methods to deposit money into wallets
- ❖ Low reliability and security

Bitrichex Exchange

Providing a cryptocurrency exchange on which investors can easily trade with the fiat of their country, as well as saving time and money (with low cost) and absolute security.

Registration form fields: Your name, Your e-mail address, Your password, Repeat your password. Includes a checkbox for 'I agree to the terms of service' and a 'LET'S GO!' button.

VISION

Bitrichex was developed by our experts from all over the world like Australia, Japan, Singapore, Vietnam and Indonesia with more than 15 years of experience in the financial industry, information technology, and the stock exchange. Our vision is to become the largest cryptocurrency currency in Southeast Asia, and Europe and be among the top 10 in the Asia-Pacific region in the next 5 years.

The platform ensures high liquidity with a stable trading volume. Our target number of users in the model in 2019 is more than 5 million people, therefore, we guarantee the frequency of access and continuation of transactions on the platform.

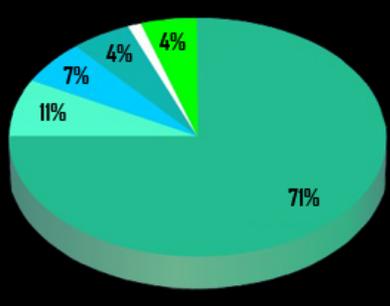

Our platform is also supported by Security and privacy to ensure all information is confidential and secure money is stored in your wallet. Bitrichex is developed on a platform that is a lot of core machines stock exchange and foreign exchange. It has been proven to be safe and reliable. The system is built on the most stable and advanced cloud infrastructure.

Connecting crypto exchanges in different countries: Bitrichex exchange allows users to trade using different fiats from many countries. This connection will make it easier for trading and transferring crypto and fiat in users' own land, as well as local currencies of other countries.

PROBLEM

There are many cryptocurrency exchanges in the world, but most of them Only provides a coin-to-coin trading pair. A popular method for altcoin trading is to buy BTC or ETH as a local currency broker (fiat), which creates a difficult and time-consuming problem for traders.
